Dear Sir/Madam,

I am writing to apply for the internship listed on the Company's website. I am a student in School of Computing and Engineering pursuing Master's degree in Computer Science at University of Missouri, Kansas City.

In the past, my work experience as Application Software Developer for the client, Wells Fargo has helped me in gaining hands-on experience in software development. Having held responsible positions before, where I was required to carry out critical duties like handling multi-million dollar transactions, day in and day out, and having worked under constant client pressure, I bring with me a fair amount of experience in working under similar circumstances. I have also completed Oracle Java Professional 6 Certification.

I recognize and value the importance that an internship has when it comes to the educational and professional benefits. It is my hope that as an intern I can take on the role for both personal experience as well as professional experience.
